EXPERIENCES

M&T Bank, Remote

Senior Software Engineer

Sept 2025 - Present

- Built 2 **Spring Boot REST API**'s used by 10K+ customers, supporting repayment assistance submissions and mortgage account number lookups
- Utilized **Jakarta Validation** to validate **JSON** requests which reduced bad submissions by 30%
- Implemented **Spring Data JPA** integrations to insert or query across 5+ **SQL Server** tables
- Integrated **Spring Boot Mail** for automated email alerts to customers.
- Used **dependency injection** with **Spring Beans** and **layered architecture** to improve maintainability and enabling onboarding of new developers 2x faster
- Maintained and upgraded enterprise **AEM** application using **Java**, **HTL**, **JavaScript** and **Bootstrap** while improving code maintainability and user experience
- Created and redesigned new mobile-friendly **AEM HTML** components to conform to new business requirements
- Collaborated with stakeholders to design scalable solutions
- Updated stakeholders with biweekly demo

Software Engineer

July 2023 – Sept 2025

- Lead development of **RESTful Python APIs** using **FastAPI**, integrating with **SQL Server** to process data for thousands of customers, reducing manual intervention and post-deployment bugs by 25%
- Authored unit/integrated tests for **Python** API's, improving reliability, upgradeability and post-deployment bugs
- Created and automated **Python** scripts which parses and sanitizes thousands of records into **SQL Server databases** for customers to look up their information
- Mentored developers in building APIs, Python scripts, promoting code quality and maintainability
- Leveraged **Automic** to schedule and automate **Python** scripts to run on a weekly basis
- Mentored 2 interns to build their skills in **Angular** development and mobile responsiveness
- Engaged with stakeholders and internal teams to determine solutions for app development

Associate Software Engineer

July 2021 – July 2023

- Developed an internal tool (**Angular and TypeScript**) that processes exception requests for thousands of customers attempting to opt out of information sharing
- Implemented **REST APIs** with **Java Spring Boot** querying incongruent data from SQL databases, reducing exception processing time for the business team
- Implemented and maintained **microservices (C#/.net)** for the bank's IVR system, improving system resilience
- Wrote **unit/integration test** for the IVR system which reduced bugs by 20%

Related Projects

Mahjong Helper/Solver

Completed Apr 2025

- Built a **REST API (Java Spring Boot)** to help players form winning Mahjong hands, reducing game time by 50%
- Implemented an optimized **backtracking** algorithm which returns all possible cards needed for a winning hand
- Deployed API using **AWS Lambda** and **API Gateway**
- Secured API with **CORS** to prevent misuse

EDUCATION

UNIVERSITY AT BUFFALO, THE STATE UNIVERSITY OF NEW YORK

May 2021

Bachelor of Science in Computer Engineering

GPA: 3.22/4.00

Technical Skills

- **Languages:** Java, Python, C#, JavaScript, TypeScript, SQL
- **Frameworks/Libraries:** Spring Boot, FastAPI, .NET, Angular, React, Bootstrap
- **Cloud & Tools:** AWS Lambda, Docker, Jira, Kibana, Automic
- **Testing:** Cypress, Integration/Unit Testing
