EXPERIENCES

M&T Bank, Remote

Senior Software Engineer

July 2024 - Present

- Upgraded Python from version 3.10.2 to 3.13.2 across multiple Windows servers and applications to maintain support and remediate vulnerabilities
- Performed maintenance and added upgrades to the bank's **AEM** application using **Java** and **JavaScript**
- Refactored team's previous projects to improve code quality and maintainability
- Led development in **Restful Python** APIs using **FastAPI** which queries and inserts 1000's of customers information from a **SQL Server** database
- Mentored other developers to create **Restful Python** APIs, promoting code quality and maintainability
- Leveraged **SQL** functions which enhanced development experience and code quality in consumer applications
- Engaged with stakeholders and internal teams to determine solutions for app development
- Authored unit/integrated tests for all **Python** API's, leading to 25% decrease in post-deployment bugs

Software Engineer

Jul 2021 - July 2024

- Developed an internal tool using **Angular** and **TypeScript** that processes exceptions created by 1000's of customers attempting to opt out of information sharing
- Mentored 2 interns to create new components and a mobile-friendly environment using **Angular**
- Implemented 3 RESTful APIs using **Java Spring Boot** that queries exception requests from a **SQL** database that contains incongruent data submitted by customers
- Implemented 5 microservices and performed maintenance and upgrades for the IVR API in **C#/.NET**
- Wrote unit tests and integrated tests for the IVR which reduced the number of bugs reported by 20%
- Created **Python** scripts that parses and sanitizes thousands of customers' information from a csv file and inserts them into **SQL** Server database
- Used **Automic** to schedule and automate **Python** scripts to run on a weekly basis

Helm Experience & Design LLC, Buffalo, NY

Development Intern

Sep 2020 - Feb 2021

- Implemented frontend components for clients' websites using React, Bootstrap, and Font Awesome icons
- Created a mobile-friendly environment for client's website using Bootstrap and CSS media queries
- Lead automated testing for current projects using Cypress and JavaScript

Related Projects

Mahjong Helper/Solver

Completed Apr 2024

- Created a user interface using **HTML**, **CSS** and **Bootstrap** that assists beginners in a game of 4 player Mahjong, resulting in speeding up the game by 50%
- Developed a REST API using **C#** and **ASP.NET Web API** framework which returns Mahjong tiles to create a winning hand or determines if a hand is a winning hand
- Coded a backtracking algorithm to create subsets of tiles which improved the runtime efficiency by 50%
- Utilized **AWS Lambda** and **API Gateway** to make API live for the user interface to use
- Configured **CORS** to prevent malicious calls and high **AWS** charges

EDUCATION

UNIVERSITY AT BUFFALO, THE STATE UNIVERSITY OF NEW YORK

May 2021

Bachelor of Science in Computer Engineering

GPA: 3.22/4.00

TECHNICAL SKILLS

- | | | | | |
|------------------|------------|--------------|------------|--------------|
| • JavaScript | • React JS | • Angular | • HTML/CSS | • Pipelines |
| • C# / .NET | • Java | • Typescript | • C / C++ | • SQL Server |
| • Python/FastAPI | • Git | • Jira | • AWS | • Kibana |

LEADERSHIPS

- Co-Lead on the Volunteering Committee at M&T Bank

Mar 2022 - Mar 2023
